

Print, Facilities  
& IT Recruitment

## Print and Document Production –

From the early days of analogue photocopiers our clients have continually strived to produce photocopies fast, on time and of the best possible quality. With the digital age now firmly established we all expect our Multi Functional Devices (MFDs) to produce prints in full colour and mono both through our networks and via the platen glass. With special software we are now able to customise each document and make them individual to each customer and in full colour at a good price.

Kings have moved with our clients demands, so as technology brings us all new challenges so we offer you our client that new service. We are here to support you with Print and Document Production staff in all areas of digital print and finishing. You may need a print person to assist you in your digital printroom operating high volume MFDs, finishing, and general good customer care so please call Kings next time you need help.

Your MFDs may be completely networked in order that documents can be sent through to your print area via e mail or over secure networks. Or you may need your operators to produce scanned images and profile them using naming protocols and linking the images to your document management system ready to be indexed and burnt onto a CD Rom.

However and whatever you require and at what time you require it Kings can supply you with both temp and perm staff into all areas of your digital printroom.

So whether you require temporary, contract or permanent support – try Kings before you go anywhere else.

**Why not call us now on 020 8303 2525**
